PREFACE

THE EXECUTIVE COUNCIL has directed that the membership roll by chapters be omitted from the present volume in as much as the *address* is of primary importance. In the omitted roll the names were listed by chapters in order of initiation, notations being made of the resigned and expelled members. Therefore, in neither section of the book will a record of such former members be found; the card files contain the complete record. The names of the dead, however, are in the alphabetical list, and are so marked.

The alphabetical section of the directory includes the *name*, *chapter*, *year of initiation*, *occupation*, and *address* of each member. The geographical section is arranged by *states* or *foreign countries*, *towns*, and the *names in the towns*, arranged alphabetically. The *chapter affiliation* and the *street address*, if known, appear after the name.

In preparing the catalogue we have written to the chapters, alumni associations, and clubs for the membership rolls of the local organizations, and from these lists the card index was corrected. In addition to this, we have sent out thousands of return cards, we have checked with the Shield mailing list and with all available publications, and we have gathered valuable data at district and national conventions.

We found, upon assuming the duties of cataloguer, that the card index was in a deplorable condition, due to the war and the changes in address incident to it; and it has taken months of labor and the cooperation of many hands to bring the task to a conclusion.

The success or failure of the directory, due to the manner in which such a publication as this one is compiled, cannot be attributed to any one person, but to the cooperation, or lack of it, of a number of people. We wish, therefore, to express our appreciation to all who have in any way helped to lighten the burden, and especially do we want to thank the following for their assistance, which was, for the most part, in no way incumbent upon them: Thomas P. Ayer, for his constant advice and help, the Executive Council; Lloyd Cheney and Howard C. Williams, for their suggestions and assistance in planning for the publication of the Catalogue; Edward H. Knight and F. S. Glover, each of whom compiled a list of his chapter, long since inactive; and Shirley Meserve, George Moore, Harry Gorgas, Howell Davis, Rossman Palfrey, Newman Dorr, Clifford Hum, Ralph Marshall, and George Esterly for their splendid work on chapter and alumni lists.

Editor, Grand Catalogue.

CHAPTER I

The first part of the book is devoted to a general survey of the subject. It begins with a definition of the term "philosophy" and then proceeds to a discussion of the various branches of the subject. The author then discusses the history of philosophy, from the ancient Greeks to the modern era. He then discusses the various methods of philosophy, from the deductive method to the inductive method. Finally, he discusses the various schools of thought in philosophy, from the Stoics to the moderns.

The second part of the book is devoted to a discussion of the various branches of philosophy. It begins with a discussion of metaphysics, which is the study of the nature of reality. It then discusses epistemology, which is the study of knowledge. Finally, it discusses ethics, which is the study of morality.

The third part of the book is devoted to a discussion of the various methods of philosophy. It begins with a discussion of the deductive method, which is the method of reasoning from general principles to specific conclusions. It then discusses the inductive method, which is the method of reasoning from specific observations to general principles. Finally, it discusses the dialectical method, which is the method of reasoning by the use of contradictions.

The fourth part of the book is devoted to a discussion of the various schools of thought in philosophy. It begins with a discussion of the Stoics, who were a school of thought in ancient Greece. It then discusses the Epicureans, who were a school of thought in ancient Greece. Finally, it discusses the moderns, who are the philosophers of the modern era.

The fifth part of the book is devoted to a discussion of the various schools of thought in philosophy. It begins with a discussion of the Stoics, who were a school of thought in ancient Greece. It then discusses the Epicureans, who were a school of thought in ancient Greece. Finally, it discusses the moderns, who are the philosophers of the modern era.

The sixth part of the book is devoted to a discussion of the various schools of thought in philosophy. It begins with a discussion of the Stoics, who were a school of thought in ancient Greece. It then discusses the Epicureans, who were a school of thought in ancient Greece. Finally, it discusses the moderns, who are the philosophers of the modern era.
